# Welcome

## TO OUR 2026 PLANT CATALOG!

WE ARE SO EXCITED TO HELP YOU GROW THIS SEASON! FOR 2026, WE'VE ADDED A HANDFUL OF NEW VARIETIES OF FLOWERS, VEGETABLES, AND HERBS THAT WE ARE ALSO EXCITED ABOUT GROWING THIS YEAR. WE'RE LOOKING FORWARD TO BRINGING MORE NOURISHMENT TO YOUR TABLE (AND GARDENS) IN THE SEASON AHEAD!

WE HIGHLY RECOMMEND ORDERING YOUR PLANTS ONLINE TO RESERVE YOUR FAVORITE ITEMS EARLY. THIS IS THE BEST WAY FOR OUR FARM TO MANAGE OUR INVENTORY, MAKE SEEDING DECISIONS, AND ASSURE THAT YOU HAVE ACCESS TO THE GREATEST SELECTION OF PLANTS THAT WE GROW. WE OFFER FLEXIBLE ON-FARM PICKUP TIMES, PICKUPS AT THE BELLAIRE FARMER'S MARKET, AND WEDNESDAY DELIVERIES TO BELLAIRE BETWEEN MAY 13 - JUNE 3. ONLINE ORDERING WILL OPEN ON SATURDAY, APRIL 11.

FOR OUR FULL PLANT DELIVERY SCHEDULE, PLEASE VISIT OUR WEBSITE AT [WWW.DAYBREAKDREAMFARM.COM/ORDER](http://WWW.DAYBREAKDREAMFARM.COM/ORDER)

WE BELIEVE THAT A GOOD CROP COMES FROM STARTING WITH THE BEST QUALITY INGREDIENTS. ON OUR FARM, WE SOURCE ORGANIC SEEDS WHEN AVAILABLE FROM SEED COMPANIES THAT WE'VE GROWN TO TRUST, AND SELECT VARIETIES THAT HAVE PROVEN HISTORICALLY RELIABLE FOR OUR OWN FARM AND OTHER LOCAL GROWERS. WE SOW OUR SEEDS IN HIGH-QUALITY ORGANIC POTTING SOIL FROM MORGAN COMPOSTING (DAIRY DOO 101), AND FERTILIZE (WHEN REQUIRED) WITH CERTIFIED ORGANIC FERTILIZERS ONLY. WE DO NOT SPRAY OUR PLANTS WITH ANY CONVENTIONAL OR INORGANIC SPRAYS.

# Our Promise To You

WE QUALITY-CHECK OUR PLANTS AS THEY ARE PACKED TO ORDER, ASSURING THEY ARE HEALTHY AND MEET OUR GROWING STANDARDS. IF YOU RECEIVE A PLANT FROM US THAT YOU ARE UNSATISFIED WITH, WE WILL GLADLY HONOR A SUBSTITUTION OR REFUND UPON REQUEST.

CSA MEMBERS MAY BE ELIGIBLE FOR FREE REPLACEMENT PLANTS, IF AVAILABLE, IN THE EVENT OF A RAVENOUS RABBIT, STARVING SQUIRREL, DEVIOUS DEER, OR NEGLECTFUL SPOUSE WHO UNKNOWINGLY MOWED OVER YOUR ZINNIAS. WE'VE ALL BEEN THERE, RIGHT? WE'VE GOT YOUR BACK.

# Planting Advice

IN OUR REGION, WE EXPECT OUR FINAL FROST DATE TO FALL WITHIN A WEEK OR SO OF MEMORIAL DAY. WE ALWAYS RECOMMEND TO CONSULT THE EXTENDED FORECAST FOR OVERNIGHT LOWS ABOVE FREEZING BEFORE PLANTING FROST-SENSITIVE PLANTS (IE. TOMATOES, PEPPERS, EGGPLANTS, CUCUMBERS, SQUASH, MELONS). CERTAIN PLANTS MAY BE SAFE TO PLANT OUTSIDE IF THEY'VE BEEN GIVEN TIME TO "HARDEN OFF" (ADJUST FROM INDOOR GREENHOUSE GROWING TO OUTDOOR CONDITIONS). COOL-SEASON CROPS MAY BE SAFE TO PLANT BY MID-MAY (IE. GREENS, KALE, CABBAGE, BROCCOLI, ONIONS, ETC.) IF THE FORECAST IS FAVORABLE.

PLANTING NEW VARIETIES CAN BE INTIMIDATING, PARTICULARLY IN A REGION WITH SUCH FLUCTUATING WEATHER PATTERNS! DO NOT HESITATE TO ASK US FOR GROWING ADVICE WHEN IT COMES TO YOUR PLANTS - WE ARE HERE TO HELP!

# HERBS

## ANISE HYSSOP

### "Anise Hyssop"

75-80 Days to Maturity

Popular bedding plant and edible flower. Very aromatic with a sweet, licorice-mint flavor. Vigorous plants produce abundant blooms, attracting bees and other pollinators. Anise hyssop is also known as giant hyssop, blue giant hyssop, fennel giant hyssop, and fragrant giant hyssop. Edible Flowers: Leaves and flowers can be used fresh or dried to flavor drinks, teas, salads, soups, pasta, and desserts.

Available in 3" pots

## BASIL

### "Genovese"

68 Days to Maturity.

Classic Italian variety.

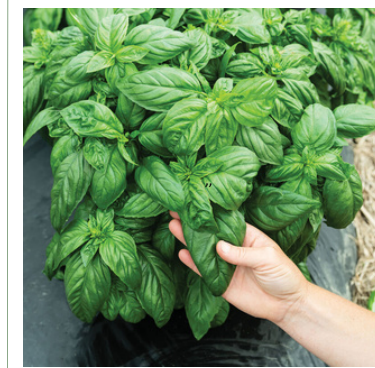

Authentic flavor and appearance. Tall and relatively slow to bolt with large dark-green leaves about 3" long. This common strain of Genovese basil can present some variability in leaf shape and plant size. Ht. 24-30".

Edible Flowers upon bloom. Use the flowers in any recipe that calls for basil, or to garnish drinks, salads, soups, pasta, and desserts. Flavor is of intense basil.

Available in 3" pots

## BASIL

### "Prospera OG (F1)"

74 Days to Maturity.

Dense, slow-bolting plants produce large, dark green, glossy, heavily cupped leaves. Traditional Genovese aroma.

Available in 3" pots

## BASIL

### "Sacred Basil" (Tulsi/Holy Basil)

75 Days to Maturity.

Musky, fragrant flowers and foliage excellent for tea and medicinal purposes. Also known as Holy basil or Tulsi, this strain is a temperate basil that is more adapted to North America than its tropical counterparts. Many medicinal properties including adaptogenic, expectorant and anti-inflammatory qualities; also an immune stimulant.

Open-pollinated tea plant, attracts pollinators

Available in 3" pots

## BASIL

### "Sweet Thai"

64 Days to Maturity.

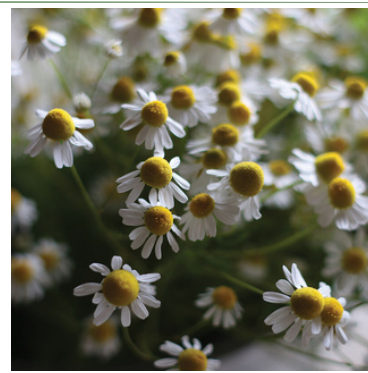

Authentic Thai basil flavor. Try it as a flavorful garnish for sweet dishes. Green, 2" long leaves have a spicy, anise/clove flavor. Attractive purple stems and blooms. Called "Horapha" in its mother country, "Hun Que" in Vietnam. Ht. 16–20".

Edible Flowers: Use the flowers in any recipe that calls for basil, or to garnish drinks, salads, soups, pasta, and desserts. Flavor is of intense, spicy basil with notes of clove and anise.

Available in 3" pots

## CHAMOMILE

### "Common"

65 Days to Maturity.

Excellent dried tea herb with prolific displays of tiny, aromatic flowers. Self-seeding annual with sweet scented daisy-like flowers that can be harvested and dried for herbal teas.

Available in 3" pots

## CHERVIL

### "Vertissimo"

60 Days to Maturity.

Brussels Winter type with dark green leaves. Excellent performance. Slow-bolting, vigorous plants. Mild, sweet anise flavor. Popular for salads, microgreens, and garnishing. Edible Flowers: Chervil's flowers are edible, and used to garnish salads. Flavor is of mild licorice.

Available in 3" pots

# CHIVES

## "Common Chives"

80 Days to Maturity.

Medium to full-size leaves excellent for dressing up soups or as a garnish. Quick growing and a good choice for greenhouse growers or those who prefer a heavy chive. Great for freezing and drying. Can tolerate partial shade. Edible flowers. Hardy in Zones 3-8.

Available in 3" pots

# CHIVES

## "Garlic Chives"

90 Days to Maturity.

Thin, flat leaves with delicate garlic flavor. Attractive white flowers in midsummer, in the second year of growth. Flowers make a great addition to bouquets. The budded flower stalks are sold as "gow choy" in Chinese grocery stores.

Edible Flowers: Pull the florets apart and sprinkle on salads, dips, sauces, soups, stir-fries, and pizza. Great as an addition to potato salad. Flavor is of mild garlic.

Available in 3" pots

# CILANTRO

## "Cruiser"

55 Days to Leaf, 100 Days to Seed.

Reliable standard cilantro with exceptional bolt resistance and strong field holding quality. Plants can reach 2' tall and have beautiful, bright green, feathery leaves. Leaves, stems, flowers, and seeds are edible and impart a zesty, aromatic flair to dishes. Great variety for cut and come again growing, especially in cooler weather.

Available in 3" pots

# DILL

## "Bouquet"

40-45 Days to Leaf Harvest, 85-105 to Seed.

Early flowering plants produce large blooms, seed umbels, and foliage on long stems, making Bouquet the preferred dill for cut-flower use and pickling. Also an economical, fast-growing choice for baby-leaf production. Edible seeds, flowers, and greens flavor many foods. Popular addition to sauces, salads, and soup. Foliage known as dill weed.

Available in 3" Pots

## LAVENDER

"Ellagance Purple"

100-110 Days to Maturity

First-year flowering lavender. Deep purple flowers bloom the first year on large dense spikes. Plants are bushy, uniform, and well-branched. An alternative to vegetative varieties. Winter hardy in Zones 5–7.

Edible flowers can be used to garnish desserts and as a distinct flavor element in baked goods. Flavor is sweet and floral and pairs well with citrus, berries, nuts, mint, and cinnamon.

Available in 3" pots

## LEMON BALM

"Lemon Balm"

70 Days to Flower

Strongly aromatic herb with lemony fragrance and excellent medicinal and culinary qualities. Shiny green leaves on full plants up to 2' tall. Harvest before flowering since leaf quality declines as flower stalks mature. Attracts bees, vigorous spreading habit, perennial, open-pollinated.

Available in 3" pots

## LEMONGRASS

"Lemongrass"

75-85 Days to Maturity.

The famous tropical lemon-flavored herb. Its long, pale green stems are thick and fleshy. This herb is a delicious addition to soups, curries, teas, and stir fries. Essential oil distilled from this variety contains large amounts of citral and geraniol and can be used for flavorings, perfumes, and insect repellent.

Available in 3" pots

## MINT

"Common Mint"

80 Days to Maturity.

A zesty, versatile herb. Use to flavor salad mix, main dishes, ice cream, and drinks.

Edible Flowers: The flowers add a minty flavor to salads, soups, desserts, and drinks

Available in 3" pots

## MINT, WILD

"Wild Mint"

Cuttings sourced and propagated from the Dreamfarm property. This wild mint grows well in moist soils and along creekbeds. It has the flavor of spearmint, and is excellent for teas, mojitos, salads and chutneys. Small purple flowers develop in summer and attract pollinators.

Available in 3" pots

## OREGANO

"Greek Oregano"

80 Days to Maturity.

Excellent culinary oregano with pungent, mouth-watering fragrance and flavor. This is the traditional full-flavored oregano for pizzas and tomato sauces. Low-growing plants have slightly furry dark green leaves with white flowers. Easy to dry, just harvest stems and hang in bundles. Hardy perennial.

Available in 3" pots

## PARSLEY, CURLY

"Grune Perle Curly"

45 Days to Maturity.

Popular Eastern European, finely curled parsley with strong stems and vigorous growth habit. Exceptionally beautiful, tufts of deep green leaves make this parsley variety a stunning addition to the herb garden or market table. With a mild flavor and vigorous growth habit, this parsley is a perfect fit for both the commercial grower and home gardener.

Available in 3" pots

## PARSLEY, FLAT LEAF

"Italian Flat Leaf"

70 Days to Maturity.

Classic flat leaf variety for use either fresh or dried for seasoning.

Stems hold leaves upright for easy bunching. A very nutritious and tasty addition to meat and vegetable dishes, soups and salads. Excellent for freezing, drying and fresh eating.

Available in 3" pots

## ROSEMARY

### "Rosemary"

80-100 Days Stem Tips, 120-180 Days Bunches.

Pine-scented, savory, culinary favorite. Native to the Mediterranean region, rosemary has silvery needle-like foliage and delicate flowers.

Available in 3" pots

## SAGE

### "Common Sage"

80-90 Days to Maturity.

A staple of the herb garden. Dusty, green leaves are used in dressing, sauces, salted herbs, sausage, and tea. Make a good base for dried floral wreaths. Also known as garden sage. Perennial in Zones 4-8.

Available in 3" pots

## THYME

### "German Winter Thyme"

90-95 Days to Maturity.

The standard winter-hardy thyme. Good flavor and yield. Classic culinary and ornamental herb. Small, round to needle-shaped evergreen leaves on woody stems. Mulch in cold winter climates. Perennial in Zones 5-8.

Available in 3" pots

# FLOWERS

## CALENDULA

### "Alpha OG"

60 Days To Maturity.

Clear bright orange blooms reminiscent of gerberas. High resin content for medicinal use. 2–3 1/2" blooms. Also known as pot marigold, common marigold, and Scotch marigold. Petals of the flowers can be used fresh or dried, flavor is tangy and slightly bitter. Remove the petals from the flower base before consuming as the base can be quite bitter.

Available in 4-packs

## CALENDULA

### "Resina"

80 Days to Maturity.

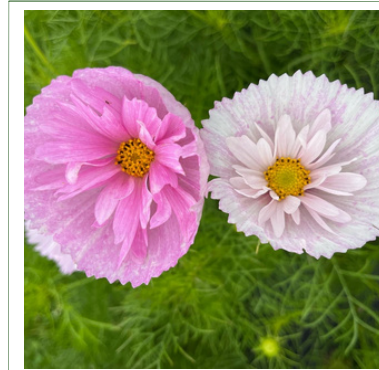

Bright yellow, daisy-like blooms with a few orange show-offs and extremely high resin content. A few orange types help keep the genetic variation of this powerful strain alive and well. Excellent medicinal properties compared to other calendulas; used as an herbal application for inflammation and localized skin problems. Also used as a dye for food or fabric and as an edible flower.

Spring bee food, 24-30" tall, Annual, Open-Pollinated.

Available in 4-packs

## COSMOS

### "Double Click Mix"

90 Days to Maturity.

Unusual double blooms.

Tall plants with large fully double and semidouble blooms. A mix of pure white and rose-colored flowers with a small percentage displaying a soft blush of pink.

Available in 4-Packs

## ECHINACEA PURPUREA

### "Echinacea Purpurea"

110 Days to Maturity.

Beautiful 3-4" coneflowers with pink-orange center cones and radiating magenta petals. Medicinal compounds are most concentrated in young flower buds and fibrous roots. This is the easiest and hardiest cultivar to grow in northern climates. Perennial plants 30-47" tall, attracts monarch butterflies. Typically blooms in second year.

Available in 3" pots

## MARIGOLD

### "Durango Outback Mix"

60 Days to Maturity.

Extra-large blooms with outstanding uniformity.

Highly branching plants. Attracts beneficial insects such as hoverflies. Also known as French marigold.

Edible Flowers: Use the flowers to dress up salads and desserts or cooked in egg or rice dishes. Flavor is floral with hints of citrus and spice, and slightly bitter. Remove the petals from the flower base before consuming as the base can be quite bitter.

Available in 4-packs

## MARIGOLD

### "Giant Orange"

70-90 Days to Maturity.

Tall, strong stems for cut flowers. Large flower heads, avg. 3", sit atop sturdy plants. These giant marigolds are prolific producers for cuts as well as excellent garden performers. Also known as African marigold, American marigold, and Aztec marigold.

Edible Flowers: Use the flowers to dress up salads and desserts or cooked in egg or rice dishes. Flavor is floral with hints of citrus and spice, and slightly bitter. Remove the petals from the flower base before consuming as the base can be quite bitter.

Available in 3" pots

## NASTURTIUM

### "Dwarf Jewel Blend"

60 Days to Maturity.

Brilliant orange, red and yellow flowers contrast nicely with round green leaves. Makes a beautiful border plant. The peppery-tasting edible flowers are exquisite when stuffed with cream cheese or added to salads for color.

Spreading habit, Edible flowers and foliage, 12-24" tall, open-pollinated annual.

Available in 3" pots

## NASTURTIUM

### "Nasturtium Blend"

60 Days to Maturity.

Attractive, sunny mix of yellow, orange, rose and crimson flowers on trailing plants. Delicate lily-petal-like leaves are just as attractive as the bright flowers. Edible flowers and foliage are a gourmet treat with flavor reminiscent of peppery watercress. Perfect for hanging baskets, containers or in the garden.

Trailing, Vines grow to 10' long. Edible flowers and foliage, Annual, Open-Pollinated.

Available in 3" pots or hanging baskets

## SNAPDRAGON

### "Potomac Custom Mix"

110 Days to Maturity.

Mix contains apple blossom bicolor, cherry rose, royal, yellow, white, red, orange, lavender, and pink. Pinching is recommended if branching is desired. .

Available in 4-packs

## SUNFLOWER

### "Goldy Double"

65 Days to Maturity.

Fully double bright golden flowers.

5-7" blooms with green-to-yellow centers. Goldy Double is a branching variety - pinching is recommended to encourage longer stems.

Available in 4-packs.

## SUNFLOWER

### "Hella Sonnenblume"

75-80 Days to Maturity.

A stunning dwarf sunflower for bouquets! Lovely 4" diameter gold-petaled blooms are incredibly uniform on sturdy 12" stems. Cute, undeniably dwarf plants reach only 3.5' in height, but from the main stalk each produces an abundance of long, ruler-straight stems perfect for cutting. Easy to harvest with long vase life - an instant stand-out in trials!

Available in 4-packs

## SUNFLOWER

### "Mammoth"

110 Days to Flower

The giant of all sunflowers with tall, thick stalks supporting huge heads that tower over the garden. This single-stemmed variety is a very fast and vigorous grower, perfect for creating living walls or fences, sunflower houses, kids' gardens and more. Also a great variety for edible seeds or feeding the birds. Towering plants are beloved by children, birds and bees.

Available in 3" pots or 4-packs

## SUNFLOWER

### "Rouge Royale"

65 Days to Maturity.

Exquisite deep burgundy petals surround an ebony center.

A pollenless branching variety, pinching is recommended to encourage longer stems.

Available in 4-packs

## TITHONIA

### "Mexican Sunflower"

85-90 Days to Maturity.

Late-season flower attracts beneficial insects.

Blooms midsummer until first hard freeze, providing bright 3–3 1/2" flowers well into fall. Most plants produce orange, with a small percentage producing red or yellow blooms.

Available in 3" pots

## VIOLA

### "Aalsmeer King Size Mix"

70-80 Days to Maturity.

Old-fashioned mix with vigorous plants. Cheerful, 2 1/2–3 1/2" bicolor blooms in shades of gold, purple, plum, lavender, rose, and white. Mildly fragrant blooms. Also known as pansy, Johnny jump-up, European field pansy, heart's ease, and hybrid violet.

Edible Flowers: Decorative and edible garnish for salads and desserts with slight wintergreen flavor. While a popular choice for brightening up salad mix, the flowers are also good for candying.

Available in 3" pots or in 12" panterra bowls

## VIOLA

### "Sorbet Formula Mix (F1)"

60-70 Days to Maturity.

Early, profuse bloomers. Upright stems (8-9") with petite, 1-1 1/2" flowers. Tolerates temperature extremes and will bloom through winter in the South when planted in fall. A formula blend of blackberry, blueberry, coconut, French vanilla, lemon chiffon, lavender ice and more. Also known as pansy, Johnny jump-up, European field pansy, and horned violet.

**Edible Flowers:** Decorative and edible garnish for salads and desserts with slight wintergreen flavor. While a popular choice for brightening up salad mix.

Available in 3"pots or 12" panterra bowls

## ZINNIA

### "Benary's Giant Mix"

75-85 Days to Maturity.

Vigorous all-season producers hold up well in summer rain and heat all over the country. Densely petaled blooms are up to 6" across. Long-lasting standouts in bouquets. Cut-and- come-again flower, yielding multiple cuts over the season. Colors include deep red, orange, lime, wine, purple, bright pink, salmon rose, and golden yellow

Available in 4-Packs

## ZINNIA

### "Queeny Formula Mix"

75 Days to Maturity.

Sturdy plants produce blooms in shades of rose, orange, peach, lemon, and lime. Pinching is recommended to encourage branching and longer cutting stems.

Available in 4-packs

# GREENS

## ARUGULA

"Esmee"

21 Days to babyleaf, 40 full size.

Beautiful, fine leaves are incised with rounded oak-leaf shape. A wonderful flavor that is more nutty than spicy sets Esmee apart from other arugulas. Deeply lobed leaves are upright, lofty and the darkest green of all our arugulas. Quick growing and very cold tolerant.

Available in 4-packs

## COLLARDS

"Champion"

70 Days to Maturity from Transplant

Selected to hold in the field up to two weeks longer than other varieties for an extended harvest. Rich blue-green cabbage-like leaves. Plants are bolt resistant, productive and hardy. Waxy leaf surface provides some natural protection from cabbage worms. Improved Vates-type. 24-36" tall, Compact habit, Open-Pollinated.

Available in 3" pots

## KALE

### "Curly Roja"

55 Days to Maturity.

Densely frilled leaf edges, stunning purple-sage color, deep purple stems and cold-hardiness are all elements of an exquisite kale bunch that holds well after harvest. Does especially well under fertile conditions. Edible and ornamental, 16-18" plants.

Available in 3" pots

## KALE

### "Darkibor (F1)"

75 Days to Maturity.

Dark green with excellent flavor, this hybrid kale produces best in spring and fall. Tall plants provide high yields of densely curled greens. Vigorous plants hold well into cold weather and are suited to overwintering production in protected areas. Resists yellowing, 18-36" tall.

Available in 3" pots, \$4/ each

## KALE

### "Black Magic Lacinato"

65 Days to Full Maturity.

Uniform Lacinato-type with striking, deep blue-green leaves and excellent flavor. Productive plants are tidy with long, upright leaves that make for easy harvest. Plants are cold and bolt resistant and produce multitudes of beautifully savoyed leaves, perfect for full-size production or whole-plant harvest. Plants are 24-36" tall. Open-Pollinated

Available in 3" pots

## KALE

### "Red Russian"

21 Days to Babyleaf, 50 to Full Maturity.

Bright purple stems and slate green, deeply lobed foliage. Leaves are tender, smooth and very sweet compared to other kales. An incredibly cold tolerant variety that improves in flavor with cold weather. Popular ingredient in baby leaf salad mixes or as full size bunches. This strain has very smooth baby leaves. 24-36" tall.

Available in 3" pots

## LETTUCE

### "Bergam's Green Leaf"

51 Days to Maturity.

Dependable green leaf lettuce for full-size heads. Bergam's Green has dark green savoyed leaves with a wavy leaf margin. Uniform, dense heads are high yielding with good flavor, excellent for summer sandwiches. For spring, summer, and fall harvest. Widely adapted.

Available in 4-packs

## LETTUCE

### "Rainier Romaine"

58 Days to Maturity.

Large romaine lettuce for full sized heads. Plants are vigorous with a strong disease package. The dense interior is packed with crispy, sweet leaves that are very uniform. Plants are dark green, upright and clean, making for efficient harvesting. Excellent candidate for spring and fall plantings.

Available in 4-packs

## LETTUCE

### "Salanova Green Butter"

55 Days to Maturity.

Dense rosette heads with attractive, thin, supple leaves. Heads have a round base with open leaf growth. Delicate, buttery flavor. Great for harvesting a whole head or used in a salad mix. Very good bolt tolerance.

Available in 4-packs

## LETTUCE

### "New Red Fire" Red Leaf

55 Days to Maturity.

Popular among growers for its uniformity, intense color and bolt tolerance. Large, loose heads are green at the base and very dark red at the ruffled leaf edges. Retains its crisp fresh flavor throughout the season.

All-season lettuce, Bolt resistant, Open-Pollinated. Intermediate Resistance to Bottom Rot or Rhizoctonia, Downy Mildew, Tip Burn

Available in 4-packs

## LETTUCE MIX

### Babyleaf "Encore Lettuce Mix"

28 Days to Maturity.

This tasty and attractive babyleaf mix features a wide variety of lettuces including romaine, lollo, green leaf, red leaf and more. A signature blend with unique shapes and colors that lettuce fans will love. Open-pollinated varieties.

Available in 4-packs

## LETTUCE MIX

### Lettuce Heads Mix

A mix of 4 heads including red 'Salanova Oakleaf', green 'Salanova Butterhead', 'Vulcan' red leaf, and 'Rainier Romaine' (or comparable varieties).

A fine mix of different textures and colors with varying dates of maturity for a long-yielding summer lettuce garden.

Available in 4-packs

## LETTUCE MIX

### Lettuce Bowls

A Dreamfarm mix of green and red lettuces with varied textures and varieties for your own cut-and-come-again salad mix. Perfect for smaller gardens or porches, and also make great gifts!

Available in 12" panterra bowls (as pictured)

## PAC CHOY

### "Prize Choy"

50 Days to Maturity.

Elegant vase-like shape, medium thick white stems and smooth, mild flavor. The best open-pollinated full sized pac choy! Prefers cool weather, but is slow to bolt in heat. Hand-selected for uniformity, vigor and bolt resistance. For early spring or fall planting.

Available in 4-packs

## SPINACH

### "Space (F1)"

40 Days to Maturity.

Vigorous, all season spinach with thick, glossy leaves that are smooth to slightly savoyed. A favorite variety of commercial growers, the plants are highly resistant to downy mildew and perform well in variable weather for all season production. Resistant to bolting with deep green leaves that maintain excellent flavor. A high yielder due to the long harvest window and exceptional field holding quality.

Available in 4-packs

## SWISS CHARD

### "Improved Rainbow Blend"

30 Days Babyleaf, 60 Days Full Sized.

Striking improved blend of red, pink, white, yellow and gold stems. Upright habit makes for clean production and easy harvesting. Color intensity is not as well defined early on; mostly pink, red and white at baby stage. Grow to full size for a dazzling display! Narrow to broad stems, Upright, easy to harvest.

Available in 3" pots

# TOMATOES

## DETERMINATE VS. INDETERMINATE TOMATO VARIETIES

---

### ● DETERMINATE

**Growing Requirements:** Determinate varieties are well suited for growing in pots and containers, as they grow in a shorter, bushier habit. Plants only grow to a certain height and produce a limited amount of fruits.

**Pruning Requirements:** Only remove the suckers below the first flower cluster to avoid affecting yield and fruit size.

---

### ● INDETERMINATE

**Growing Requirements:** Indeterminate plants continue to grow and produce fruit along the stems for their entire growing season.

**Pruning Requirements:** Pruning all suckers from the ground level up to the second flower is recommended. Trellising and cages several feet high will help support these vertically inclined plants.

## TOMATO, CHERRY

### "Black Cherry"

64 Days to Maturity. Indeterminate.

Round, full-flavored cherry with distinctive purple-black color. One-inch fruits with the juicy, meaty texture and sweet, rich flavor characteristic of all Russian black tomatoes. A striking addition to cherry tomato mixes. Very productive plants.

Indeterminate, 1-1.5 oz, Open-Pollinated.

Available in 3" pots

## TOMATO, CHERRY

### "Sakura (F1)"

55 Days to Maturity. Indeterminate.

Early, delicious, attractive red cherry tomatoes. Real sweet tomato flavor and firmness without being hard. Among the first to ripen, Sakura keeps going all season long because of its disease resistance. Very tidy, compact plant fits well in tight spaces. Prolific yielder of bright red, shiny, medium-large cherry tomatoes that average 20–22 gm. High resistance to Fusarium wilt, leaf mold, and tomato mosaic virus; and intermediate resistance to nematodes.

Available in 3" pots

## TOMATO, CHERRY

### "Sungold (F1)"

57 Days to Maturity. Indeterminate.

Intense fruity flavor. Exceptionally sweet, bright tangerine-orange cherry tomatoes leave everyone begging for more. Vigorous plants start yielding early and bear right through the season. Tendency to split precludes shipping, making these an exclusively fresh-market treat. The taste can't be beat. 15-20 gm. fruits. High resistance to fusarium wilt and tobacco mosaic virus.

Available in 3" pots

## TOMATO, GRAPE

### "Rosalita (Heirloom)"

65 days to maturity. Indeterminate.

Vigorous plants bear heavy crops of beautiful rosy-pink colored grape tomatoes, 8-15 fruits per branch. These tomatoes get sweeter as their pink color deepens.

Available in 3" pots

## TOMATO, HEIRLOOM

### "Brandywine"

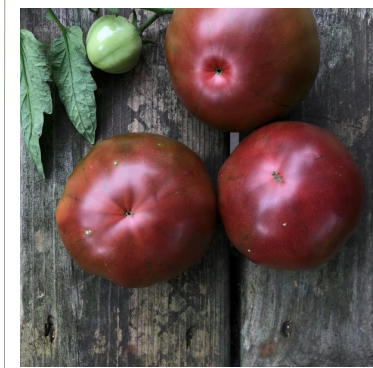

75 Days to Maturity. Indeterminate.

One of the best tasting tomatoes. We describe Brandywine's luscious, heirloom flavor as "very rich, loud, and distinctively spicy." The large fruits, often over 1 lb., have a deep-pink skin and smooth, red flesh. The medium-tall, potato-leaf plant is best staked or caged. This 'Quisenberry' strain is considered among the best.

Available in 3" pots

## TOMATO, HEIRLOOM

### "Cherokee Purple"

75 Days to Maturity. Indeterminate.

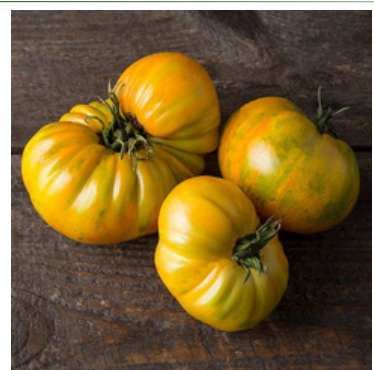

Unusual variety with full flavor.

Famously rich flavor and texture make this a colorful favorite among heirloom enthusiasts. Medium-large, flattened globe, 8-12 oz. fruits. Color is dusky pink with dark shoulders. Interior coloring ranges from purple to brown to green. Relatively short vines.

Available in 3" pots

## TOMATO, HEIRLOOM

### "COPIA"

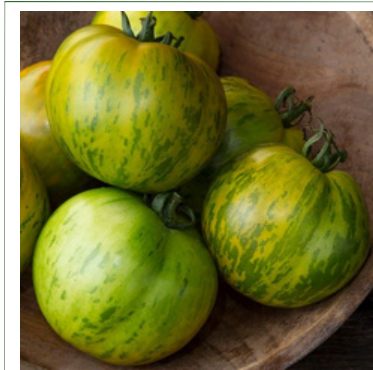

85 Days to Maturity. Indeterminate.

Unique large gold fruits with a blend of orange/red and green/red striping. Sweet, juicy flesh is swirled with color throughout. This Green Zebra and Marvel Stripe cross is named for COPIA, the American Center of Food, Wine and the Arts in Napa, CA. 12-16 oz fruits.

Available in 3" pots

## TOMATO, HEIRLOOM

### "Green Zebra"

75-80 days to maturity. Indeterminate.

Popular succulent green fruits with sweet and zingy flavor. Medium-sized fruits start out pale green with dark green stripes that soften and turn yellow when ripe. Perfect exteriors; fruits hold up under adverse conditions and rarely crack. 4-5 oz fruits.

Available in 3" pots

## TOMATO, HEIRLOOM

### "Marianna's Peace"

75 days to maturity. Indeterminate.

Pink heirloom that originated in Czechoslovakia. Dense, creamy, sweet beefsteak-style fruits with rich complex, old tomatoey flavors.

Available in 3" pots

## TOMATO, HEIRLOOM

### "Paul Robeson"

75 Days to Maturity. Indeterminate.

A striking Russian heirloom with dusky red (aka "black") fruit, famous for its rich, distinctive smoky sweetness and salty, juiciness. Just the right balance of acidity and sweetness, is a standout in salads, sandwiches, and for fresh eating. Originating in Russia, it was named in honor of African-American bass singer and social justice activist Paul Robeson, who was revered in Russia.

Available in 3" pots

## TOMATO, HEIRLOOM

### "Rose De Berne"

75 Days to Maturity. Indeterminate.

Beautiful rose-pink Swiss heirloom with big flavor and crack resistance. A chart topper in taste tests, the medium sized fruits, with soft yet durable skin, have an even balance of acidity and sweetness that is perfect for a sandwich or in a quick tomato sauce. Earlier to ripen than other larger varieties and a consistent producer well into the season. Resists cracking, 4-8 oz fruits.

Available in 3" pots

## TOMATO, PASTE

### "Amish Paste (Heirloom)"

85 Days to Maturity. Indeterminate.

A longtime favorite heirloom plum. Large for a sauce tomato, Amish Paste's slightly irregular plum to strawberry-shaped fruits avg. 8-12 oz. with excellent flavor. These meaty tomatoes are good in salads and great for processing. A Slow Food USA Ark of Taste variety.

Available in 3" pots

## TOMATO, PASTE

### "Blue Beech (Heirloom)"

82 Days to Maturity. Indeterminate.

High-yielding heirloom paste tomato. This "sausage" type paste tomato produces large, 8–10 oz., elongated fruits that are easy to process into sauce. An excellent canning tomato, it also tastes great when eaten fresh. Attractive green shoulders give a distinct heirloom look. Fruits ripen during a concentrated period, allowing for a more efficient canning process. It is well-adapted to northern climates, and resists disease and blossom end rot better than others of its type. This strain of Blue Beech was originally brought to Vermont from Italy during WWII. Indeterminate.

Available in 3" pots

## TOMATO, PASTE

### "Pirkistine Yellow (Heirloom)"

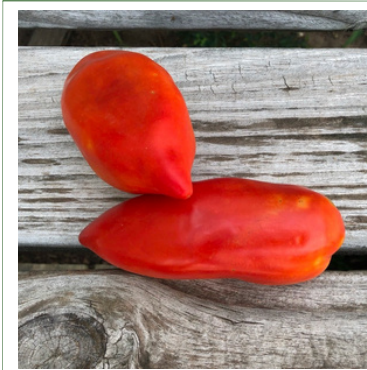

80 Days to Maturity. Indeterminate.

Very productive plants produce sausage-shaped, lemon-yellow paste tomatoes. Wonderful flavor for canning and fresh eating.

Available in 3" pots

## TOMATO, PASTE

### "Polish Linguisa (Heirloom)"

73 Days to Maturity. Indeterminate.

Plants produce excellent yields of 10 oz red tomatoes. Taste is very sweet; huge sausage shaped tomatoes are excellent for making paste and sauce.

Available in 3" pots

## TOMATO, SALADETTE

### "Blush"

70 Days to Maturity. Indeterminate.

Sweet, fruity flavor has universal appeal. Beautiful, bright yellow snacking tomato. Red stripes appear as blossom-end red marbling develops. Strong plants tolerate tough conditions. Great in mixes with the other Artisan tomatoes. 25-30 gm. fruits.

Available in 3" pots

## TOMATO, SALADETTE

### "Lucky Tiger"

70 Days to Maturity. Indeterminate.

Unique look and exceptional flavor. As Lucky Tiger ripens, the green striping becomes more defined and the background turns red as the interior marbling develops. The overall effect when ripe is of a red tomato with prominent green striping. Excellent sweet, tart flavor. Lucky Tiger was bred with high vigor to perform under tough conditions. 25-30 gm. fruits.

Available in 3" pots

## TOMATO, SALADETTE

### "Red Torch (F1)"

65 Days to Maturity. Indeterminate.

Early striped snacking tomato. A delicious, small saladette in the Juliet size class. Fruits avg. 1 1/2 oz. and are a beautiful shade of red with yellow stripes. This prolific early producer is crack-resistant and performs well even under heavy disease pressure. AAS winner.

Available in 3" pots

## TOMATO, SLICER

### "Galahad (F1)"

55 Days to Maturity. Determinate.

High yielding, compact plants covered in delicious, crack resistant tomatoes with sweet, meaty flesh. These vibrant red tomatoes have broad shoulders and excellent disease resistance to late blight. The large, clean fruits produce abundantly on compact, sturdy plants and have great field holding quality. An AAS Winner that is as delicious and flavorful as it is productive. Crack resistant, 9-10 oz, Hybrid.

Available in 3" pots

## TOMATO, SLICER

### "Mountain Fresh Plus (F1)"

75 Days to Maturity. Determinate.

The most widely-grown market tomato in the East and Midwest. Able to tolerate cool and wet conditions, this big red tomato produces attractive, 8-16 oz. slicers with good flavor. Vigorous plants provide plenty of leaf cover. High resistance to fusarium wilt races 1, 2, nematodes, and verticillium wilt.

Available in 3" pots

## TOMATO, SLICER

### "New Girl (F1)"

62 Days to Maturity. Indeterminate.

Early, prolific variety with great flavor and disease resistance. Bright red, with variable shape; most fruits are round with pointy bottoms. Terrific acid-to-sugar balance. 4-6 oz fruits.

High Disease Resistances: Fusarium Wilt (1,2), Verticillium Wilt

Available in 3" pots

## TOMATO, SLICER/BEEFSTEAK

### "Big Beef (F1)"

70 Days to Maturity. Indeterminate.

Nice combination of size, taste, and earliness. Still unsurpassed as the top choice for fresh market beefsteak tomatoes. Large, avg. 10-12 oz., mostly blemish-free, globe-shaped red fruit. They have full flavor - among the best - and ripen early for their size. Broad disease resistance package. High resistance to Alternaria stem canker, Fusarium wilt races 1, 2, gray leaf spot, nematodes, tobacco mosaic virus, and Verticillium wilt. AAS winner.

Available in 3" pots

## TOMATILLO

### "Toma Verde"

60 Days to Maturity.

Early variety with tart flavor when young, becoming sweeter as it ripens. Medium to large size fruits are ready to harvest when husks split and fruit color changes from a yellow green to medium green. Perfect for Salsa Verde or as a special addition to any Mexican dish.

Semi-determinate, Uniform fruit, Open-Pollinated.

Available in 3" pots

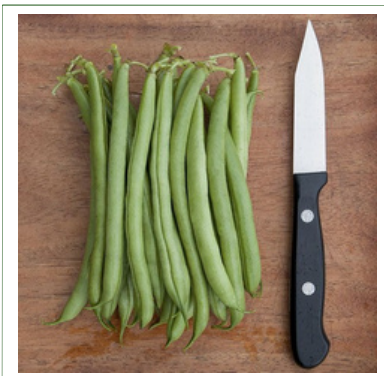

# VEGETABLES

---

## BEAN, BUSH

### "Provider"

50 Days to Maturity.

The standard fresh market variety for green beans.

Provider comes through every year with early, heavy yields of attractive, uniform beans. Plants are vigorous and productive with strong root systems, even under adverse conditions. Good resistance to common mosaic virus and powdery mildew. Purple seeds. 5-6" uniform pods.

Available in 4-packs

## BEAN, BUSH

### "Tri-color"

50-55 Days to Maturity

A delightful mix of green, yellow and purple bush beans.

This mix of Provider, Celine and Gold Rush Yellow Wax is perfect for the gardener with limited space. NOTE: Provider will mature first, followed by Gold Rush, and then Celine.

Available in 4-packs

## BEAN, EDAMAME

"Midori Star Soybean"

95-100 Days from Direct Seed to Maturity.

Bright green plants are bushy, vigorous, and productive. Each fuzzy seed pod contains 2-3 bright green soybeans. This deliciously sweet and slightly nutty-tasting, high-protein snack can be steamed or boiled and served with sea salt. Perfect for edamame lovers.

Available in 4-packs

## BROCCOLI

"Covina (F1)"

75 Days to Maturity.

Vigorous plants withstand a wide range of environmental stresses to reliably produce uniform, tight domes. This workhorse broccoli with upright, large-framed plants produce big, tightly beaded 6-8" heads for reliable harvests. Good for both spring and fall production.

Available in 3" pots

## BROCCOLINI

"Happy Rich (F1)"

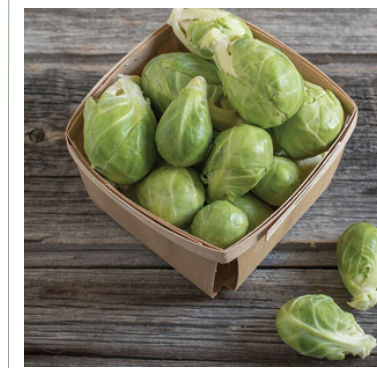

27 Days from Transplant to Maturity.

Uniform, vigorous, dark green plants produce jumbo-size florets that resemble mini heads of broccoli, and have an excellent, sweet, broccoli flavor. This sprouting broccoli produces ample amounts of side shoots when plants are spaced 12-18" apart. For a single crop harvest, space plants 6-8" apart. Pinching not necessary.

Available in 3" pots

## BRUSSELS SPROUTS

"Nautic (F1)"

120 Days to Maturity from Transplant.

Disease resistant variety for a reliable crop of tightly wrapped sprouts. Nautic F1's sprouts are spaced further apart, allowing plants to dry out quickly to avoid spread of disease and making it easier to harvest individual sprouts. Vigorous and sturdy plants with 1" sprouts. Easy to harvest.

Disease Resistance: Fusarium Yellows and Black Rot

Available in 3"pots

## CABBAGE

### "Farao (F1)"

63 Days to Maturity from Transplant

Delicious, early heads are sweet and tender! Leaves are thin and juicy with a slight peppery bite, perfect for stir-fries and egg rolls. Small, uniform heads with attractive rosebud wrappers are great for smaller households and pack nicely in boxes. Round heads with a short core hold well in summer heat; habit suitable for dense plantings. 3-4 lb heads.

Available in 3" pots

## CABBAGE

### "Primero (F1)"

62 Days to Maturity from Transplant

Early producing, compact, dark red heads ideal for tightly spaced, succession plantings. Texture is tender and very sweet with a manageable head size that is perfect for a single meal. Plants are uniform and highly productive, and can be planted at a tight spacing. Plants head up quickly which makes them perfect for succession growing. Core is short and Interior leaves are plentiful, protected by nice wrapper leaves. 2-3lb heads.

Available in 3" pots

## CABBAGE, NAPA

### "Bilko (F1)"

63 Days to Maturity from Transplant

Bilko heads average at 12" tall and slow-bolting heads with good, mild, sweet flavor. Broad white midribs and pale green outer leaves with a creamy yellow interior. Long storage potential.

Available in 3" pots

## CAULIFLOWER

### "EarliSnow (F1)"

45 Days to Maturity from Transplant

Early to market! Performs well in both spring and fall trials. Earlier, more consistent, and more dependable than Snow Crown. Medium- size plant with an average wrap. Widely adapted.

Available in 3" pots

## CAULIFLOWER

### "Purple Moon (F1)"

62 Days to Maturity from Transplant

Exceptionally early purple cauliflower. Very attractive, medium-dark, purple heads. Best-performing purple variety in warm weather and also makes an excellent fall crop. Widely adapted.

Available in 3" pots

## CELERY

### "Merengo (F1)"

80 Days to Maturity.

Early variety with compact plants. Robust plants grow quickly and have good flavor and texture. Tall, dark green stalks with healthy tops. Performs extremely well in wet conditions. Vigorous, 28" tall.

High Disease Resistance to Fusarium Yellows.

Available in 4-packs

## EGGPLANT

### "Black Beauty"

72 Days to Maturity

As beautiful as it is delicious - the Organic Black Beauty Eggplant (also sometimes referred to as "Imperial Black Beauty") is the classic heirloom eggplant that has set the standard for over a century. Black beauty will typically yield 4 - 6 fruits per plant, weighing 1-3 lbs. Plant Organic Black Beauty Eggplant seeds indoors or out for a bountiful harvest.

Available in 3" pots

## EGGPLANT

### "Listada De Gandia"

85 Days to Maturity.

Stunning magenta-striped Italian eggplant for a beautiful display. Very productive plants produce abundant tender, delicious fruits with unusually thin skin. Egg-shaped petite fruits fit in the palm of your hand and are great for smaller portions. Holds its color even at large sizes. 3-5" fruits.

Available in 3" pots

## EGGPLANT

### "Ping Tung Long"

70 Days to Maturity.

Easy-to-grow Asian eggplants are long and slender with tender magenta skin. Productive plants yield up to 20 fruits each and are vigorous and stress tolerant. Slim fruits average 1-2" wide; plants should be staked for straight fruit. No peeling required. Compact habit, Excellent for containers. 12-14" fruit, Heirloom variety.

Available in 3" pots

## FENNEL

### "Preludio"

75 Days to Maturity.

This variety stands out with its lightly sweet flavor, uniformity and ability to hold in the field without bolting. Upright plants are easy to harvest. Early variety recommended for spring and summer harvest with good fall performance as well.

Available in 4-packs

## KOHLRABI

### "Trero"

42 Days to Maturity

Early forming bulbs are white, tender and ideal for fresh eating. The white bulbs have a thin, supple skin that makes them delicious in salads and slaws. Bulbs are globe shaped and the plants are highly resistant to bolting as the temperatures begin to climb.

Available in 4-packs

## PEAS, SNAP

### "Sugar Snap"

58 Days to Maturity.

Most flavorful snap variety. Sugar Snap has become a household name for its sweet, crisp pods. Seeds germinate well in cold, wet soil and the tall, vigorous plants quickly produce a thick stand that requires support. Yields well over a long season in both hot and cold weather. Remove string from pods before cooking. Not mildew resistant.

Available in 4-packs

# PEPPERS

## PEPPER, HOT

"Altiplano (F1) Serrano"

57 Days Green, 77 Days Red Ripe.

Large-fruited serrano. An impressive size at 4 1/2-5" long. Altiplano peppers are faster to harvest than types with smaller fruits. Traditional serrano flavor and pungency. Medium-large plants.

Available in 3.5" deep pots

## PEPPER, HOT

"Arriba (F1) Jalapeño"

57 Days Yellow

High-yielding yellow jalapeño. Pale yellow to start, the 3 1/2-4" long fruits transition to an orangey red, finally ripening to bright red. Though typically eaten yellow, fruits can be consumed at any stage of ripeness. Medium-size plants have high yield potential. An excellent salsa ingredient, Arriba is also delicious either as a substitute or an addition to recipes calling for green jalapeños. Also known as a "Caribe" type pepper.

Available in 3.5" deep pots

## PEPPER, HOT

### "Helios (F1) Habanero"

67 Days Green, 87 Days Orange Ripe

Extra-early hybrid habanero. Fruits avg. 2 3/4" x 1 1/2" and are very hot. Much earlier, higher yielding, and with bigger fruits than the standard OP habanero. Good yield potential, even in northern and short-season regions. Medium-large upright plants. Disease Resistance: Pepper Mottle Virus (Intermediate) and Tomato Spotted Wilt Virus (Intermediate).

Available in 3.5" deep pots

## PEPPER, HOT

### "Hot Paper Lantern Habanero"

70 Days Lime Green, 90 Days Red Ripe.

Earlier and more productive than regular habaneros. Magnificent, elongated and wrinkled, red, lantern-shaped fruits are 3-4" long. Early maturing for a habanero. Tall plants.

Available in 3.5" deep pots

## PEPPER, HOT

### "Hungarian Hot Wax"

58 Days Pale Yellow, 83 Days Red Ripe.

Yellow hot pepper with 5 1/2" x 1 1/2" smooth, waxy fruits tapering to a point. Easy to stuff and to peel after roasting; thick-fleshed for frying. Its sunset-ripening peppers change from yellow to orange to red, and make the prettiest pickled peppers. Widely adapted and productive, even in cool weather.

Available in 3.5" deep pots

## PEPPER, HOT

### "Jalafuego Jalapeño (F1)"

70 Days Green, 93 Days Red Ripe.

Productive, vigorous plants yield multitudes of extra smooth, dark green fruit. Highly disease resistant plants tolerate and produce through many climatic variables. Extra-long fruits make plants perfect for growing conditions that may cause fruit to shorten. Fruit are resistant to cracking, have wonderful flavor, and have the perfect amount of heat..

Available in 3.5" deep pots

## PEPPER, SPECIALTY

### "Bastan (F1) Poblano Pepper"

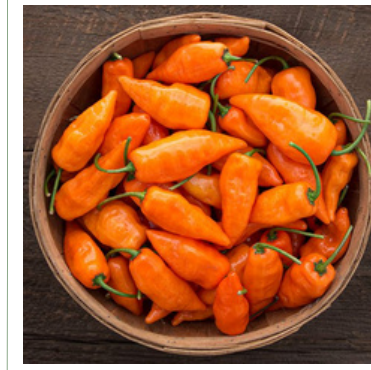

65 Days Green, 85 Days Chocolate.  
Large, high quality dark green chiles on productive plants.

Thick-walled, medium-sized fruits are a glossy dark green, nearly black, maturing to a deep chocolate with mild heat. Plants have an upright habit with excellent leaf cover and concentrated fruit set; extremely high yielding. Delicious roasted, stuffed, battered and fried - try them stuffed with smoked gouda and grilled!

Available in 3.5" deep pots

## PEPPER, SPECIALTY

### "Habanada Sweet Specialty"

75 Days Green, 100 Days Orange Ripe

Tangerine colored fruits featuring the brilliant floral flavor of a habanero pepper without the heat. This beautiful, specialty pepper brings all the complexity and sweetness of a habanero pepper but has no kick. This variety has been selected and perfected for over a decade and is sure to become a favorite of market growers, chefs and adventurous home cooks for its unique applications. Plants are prolific, heavy producers. 2-3" fruits. Open-Pollinated.

Available in 3.5" deep pots

## PEPPER, SPECIALTY

### "Roulette" (F1)"

70 Days Green, 90 Days Red Ripe.

Red habanero without the heat! Another exciting addition to our "no heat" habanero lineup. Roulette imparts a sweet, floral flavor without the traditional fire expected from an habanero. The beautiful, bright red fruits avg. 3" x 1 3/4" and are borne on large, sturdy plants.

Available in 3.5" deep pots

## PEPPER, SPECIALTY

### "Shishito Pepper"

60 Days Green, 75 Days Red.

Small, mild Japanese pepper for roasting, pan-frying and grilling. Thin walls blister and char easily when roasted or grilled, taking on rich flavor that is delicious with coarse salt and lemon juice. The occasional fruit will display heat. Typically harvested and used green, but eventually turns orange and red with sweeter flavor. Prolific Spreading habit, 2-4" mild fruits.

Available in 3.5" deep pots

## PEPPER, SWEET

### "Golden California Wonder Bell Pepper"

60 Days Green, 72 Days Yellow Ripe.

High yields of deep gold, thick-walled fruits that set well in cool conditions. Sturdy, upright 22-30" plants are everbearing and pendant. One of the best open-pollinated gold peppers available! Cool tolerant, 4-4.5" fruits. Open-Pollinated

Available in 3.5" deep pots

## PEPPER, SWEET

### "Gourmet (F1) Bell Pepper"

65 Days Green, 85 Days Orange Ripe.

Bright orange fruits. Medium-large blocky fruits have thick walls and are very sweet and flavorful. Widely adapted and performs well under a wide variety of conditions. Strong compact plants have a high yield potential. High Disease Resistance to Tobacco Mosaic Virus.

Available in 3.5" deep pots

## PEPPER, SWEET

### "Picnic Pepper - Orange"

60 Days Green, 82 Days Orange.

Deep orange color with a rich sweet pepper flavor. The orange Picnic Pepper is sweet tasting and has a lovely warm color. Selected for thick walls, flavor, strong yields and an upright plant habit. 3-5" fruits.

Available in 3.5" deep pots

## PEPPER, SWEET

### "Picnic Pepper - Red"

60 Days Green, 78 Days Red Ripe.

The red picnic pepper has unbelievable sweetness, and a rich complex flavor that makes them addictive. Bred with an emphasis on flavor, yields and plants that stand up straight for easy harvest. After on-farm trials in Wisconsin in 2016, growers commented that they had trouble selling ripe fruit because their kids and partners ate them out of the field as soon as they turned red. 3-5" fruits.

Available in 3.5" deep pots

## PEPPER, SWEET

### "Picnic Pepper - Yellow"

60 Days Green, 84 Days Yellow.

Vivid bright yellow with a bright, tart taste. The yellow Picnic Pepper has a nice tart flavor with good complexity and a nice crisp crunch. Selected for upright plant habit, good flavor and thick walls. 3-5" fruits.

Available in 3.5" deep pots

## PEPPER, SWEET

### "Red Knight (F1) Bell Pepper"

57 Days Green, 77 Days Red Ripe.

Improved King Arthur type. Big, blocky fruits are early to turn red. Stronger disease resistance than King Arthur and a more compact, open plant. Flavor is fruity and sweet. Widely adapted. High resistance to bacterial leaf spot races 1-3 and potato virus Y.

Available in 3.5" deep pots

# ONIONS, LEEKS, & SHALLOTS

## LEEKS

### "Tadorna"

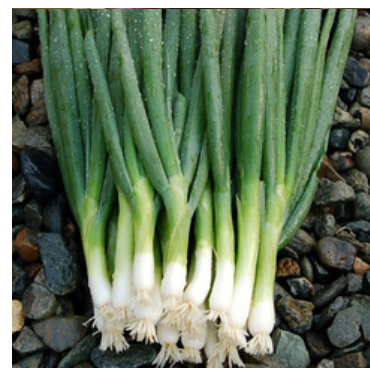

110 Days to Maturity.

Exceptional winter leek with highly uniform, stocky, dark green shafts that size up well and hold into the fall. Plants have reliable, vigorous growth and impressive field resistance to disease. Well adapted to many regions; can be overwintered in mild climates. We have seen good field resistance to leaf blights. Excellent open-pollinated variety for both the home garden and for commercial production.

Available in 4-packs (clustered leeks started from seed, 4-6 plants per cell).

## ONION, BUNCHING

### "Parade (F1)"

70 Days to Maturity.

Uniform, upright bunching onion. Dark green and vigorous stalks with no bulbing at all, making cleaning easy and quick. Parade has a nice, mild onion flavor.

Available in 4-packs (clustered onions from seed, 4-6 plants per cell)

## ONION, RED

### "Red Carpet (F1)"

115 Days to Maturity.

Vibrant red, long-day storage onion. Very good yields and strong skins. Red Carpet dries and stores well. Adaptation: 40–45°.

Available in 4-packs (clustered onions started from seed, 4-6 plants per cell).

## ONION, SWEET

"Ailsa Craig"

105 Days to Maturity.

Large Spanish onion with delicious sweet flavor perfect for burgers and salads. Huge bulbs are mild, sweet and firm with light golden skins. Small necks allow for longer storage than other Spanish-types; stores up to one month. Named for a perfectly round, solid rock island off the coast of Scotland. Long day onions produce large 5-6" bulbs

Available in 4-packs (clustered onions started from seed, 4-6 plants per cell).

## ONION, YELLOW

"Cortland (F1)"

105 Days to Maturity.

Organic yellow storage onion. Large, blocky-round, uniform onions with thin necks that will dry well. Very hard with a thick, rich brown skin for good storability. High resistance to fusarium basal rot. Adaptation: 38-55° latitude.

Available in 4-packs clustered onions started from seed, 4-6 plants per cell).

## SHALLOT

"Innovator (F1)"

110 Days to Maturity.

Elongated, shiny oval bulbs with copper skin, perfect for long term storage. A triumph in shallot breeding, it is the first variety from seed to have a high resistance to downy mildew. Flesh is a beautiful pink with a mild, sweet flavor that is excellent in raw and cooked preparations.

Stores well, 2-3" bulbs, Hybrid.

Available in 4-packs (clustered shallots started from seed, 4-6 plants per cell).

# CUCUMBERS, MELONS, & SQUASH

## CUCUMBER, PICKLING

"National Pickling"

52 Days to Maturity.

Short, thick cucumbers with blunt ends are perfect for pickles and delicious in salads. Fruits have striped, medium green skin and a slightly tapered shape to fit in a pickle jar. A heavy producer with black spines. Productive 5" fruit, Open-Pollinated.

High Resistance to Cucumber Mosaic Virus, Scab

Available in 3" pots

## CUCUMBER, SLICING

"Manny (F1)"

55 Days from Transplant to Maturity.

Thin, lightly ribbed fruits are high yielding with excellent field performance. Crisp, consistent fruit set on hardy plants that do not require fertilization which allows for early productivity even under climatic stress. Performs exceptionally well on trellis while also producing heavy yields in the field. Parthenocarpic, Gourmet Beit Alpha-type. 5-7" fruit

Intermediate Resistance: Cucumber Vein Yellows Virus, Powdery Mildew

Available in 3" pots

## CUCUMBER, SLICING

### "Marketmore 76"

65 Days to Maturity.

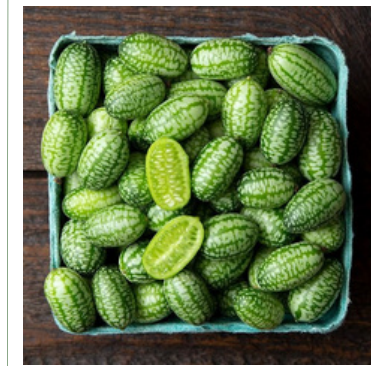

Marketmore 76 remains the most widely-planted open-pollinated slicer in the US! Dark green fruits stay green and mild-tasting even under heat stress, while multiple disease resistances keep plants vigorous and highly productive across a long picking season. Showed good resistance to angular leaf spot and anthracnose in trials.

Vigorous, Monoecious, 8-9" fruit, Open-Pollinated.

Available in 3" pots

## CUCUMBER, SPECIALTY

### "Cucamelon Mexican Sour Gherkin"

67 Days to Maturity.

Gorgeous vines produce small, tiger-striped fruit with excellent crunch and tangy, citrus flavor.

Also known as Mexican Sour Gherkins, plants produce best in heat and are well suited to greenhouse production. Can be grown in containers with trellising as vines rarely exceed 8' in length. Fruit has excellent flavor and a crunchy texture that holds up well to pickling. Fresh eating or pickling, 1" fruit, Open- Pollinated.

Available in 3" pots

## MELON, CANTELOUPE

### "PMR Delicious 51 (F1)"

75 Days to Maturity.

Reliably early melon, ripening quickly for heavy yields of aromatic fruit. Juicy, perfectly sweet flesh is dark orange with creamy texture and strong flavor. Thinner skin than hybrids but holds well for market and in storage. Excellent resistance to powdery mildew and well adapted for northern growers. Harvest at full slip.

Available in 3" pots

## MELON, KOREAN

### "Golden Giant (F1)"

60 Days to Maturity.

Crisp and refreshing. Korean types like Golden Giant are often favored by people who find other melons to be too sweet or musky. The cylindrical, 9-10" long fruits avg. 2 1/2 lb. Fruits have yellow skin with prominent white sutures and firm, white flesh. Performs well in cool weather. Harvest when fruits turn slightly golden, at forced slip, or cut from vine.

Available in 3" pots

## MELON, WATERMELON

### "Sugar Baby Watermelon"

75 Days to Maturity.

Excellent short season variety with reliable yields of sweet, juicy melons. The standard for small watermelons! Perfectly rounded fruits range from 7-8.5" in diameter with a solid green rind and deep red flesh. This strain has been selected for cool growing conditions and high yields. Drought tolerant, 6-12 lbs, Open-Pollinated.

Available in 3" pots

## PUMPKIN, PIE

### "New England Pie"

105 Days to Maturity.

Classic pie pumpkin with dry, stringless flesh and superior thick consistency in pies. Attractive fruits have dark orange skin with light ribbing and well attached handles. Stores well, 4-6 lb fruit.

Available in 3" pots

## SQUASH, SUMMER

### "Yellow Crookneck"

50 Days to Maturity.

Tender lemon-yellow fruits. Signature bent fruit are best harvested at 5-6" long or smaller for best flavor and texture. Strain has been selected for yield, shape and quality. If left to overgrow, can be used for a dark yellow, warty ornamental gourd. Prolific yields, best harvested at 6".

Available in 3" pots

## SQUASH, WINTER

### "Sweet REBA Acorn Squash"

90 Days to Maturity.

High yielding, uniform, disease resistant variety that allows for good sugar production.

Resistant Early Bush Acorn (REBA) continues putting energy into developing sugars long after everything else has withered. Bush habit, mildew resistant, high yielding, uniform, 4-5 fruits/plant. 2-2.5lb fruits, open-pollinated.

Available in 3" pots

## SQUASH, WINTER

### "Baby Blue Hubbard"

95 Days to Maturity

Highly marketable scaled-down blue hubbard with smooth gray skin and sweet flesh. Fruits are of consistent quality and teardrop shaped, with sweeter flesh than the standard Blue Hubbard. Our strain has been improved for uniformity on the High Mowing farm. Excellent trap crop for cucumber beetles, who prefer Blue Hubbard above all. 5-7lb fruits

Available in 3" pots

## SQUASH, WINTER

### "Waltham Butternut"

105 Days to Maturity.

By far the most widely grown open-pollinated butternut with delicious, finely textured dark orange flesh. Uniform fruits with smooth, tan skin that is easily peeled with a potato peeler. This strain has been selected for uniformity of size, shape and yields. Excellent keeper if cured properly. Stores well, Vining habit, Uniform, 4-5 lb fruits.

Available in 3" pots

## SQUASH, WINTER

### "Bush Delicata"

80 Days to Maturity.

Compact, tidy plants with sweet, oblong fruits. Delicious smooth, nutty flesh with hints of butter and brown sugar. Skin starts creamy white with green stripes and flecks, curing to striped light yellow. Compact plants spread only 4-6 feet. All-America Selection (AAS) winner. Semi-bush habit, 1.5-2 lb fruits.

Available in 3" pots

## SQUASH, WINTER

### "Spaghetti"

88 Days to Maturity.

The classic pasta alternative. This excellent OP strain's flesh has the best noodle-like consistency in field trials. Slightly sweet, nutty flavor. Oblong in shape with ivory skin that changes to pale yellow at maturity. An excellent pasta alternative — bake or boil, fork out the flesh, and top the "spaghetti" with your favorite sauce. Short vines. Avg. weight: 3—5 lb. Avg. yield: 4—5 fruits/plant.

Available in 3" pots

## ZUCCHINI

### "Dark Green Zucchini"

50 Days to Maturity.

Vigorous variety produces good yields of straight, smooth fruits. An open-pollinated variety best suited to the home garden, with abundant yields of lightly mottled dark green fruits. Pale greenish-white, firm flesh. Harvest at 6-8", Bush-type habit, Open-Pollinated.

Available in 3" pots

## ZUCCHINI

### "Yellowfin (F1)"

50 Days to Maturity.

Uniform, cylindrical fruits with bright yellow coloration.

Pure gold-colored fruits with buttery flavor simply glow. Compact, nearly spineless plants have an open habit for ease of harvest. Intermediate resistance to cucumber mosaic virus and powdery mildew for a reliable harvest even in challenging field conditions. 6-8" fruits.

Available in 3" pots

THANK YOU  
FOR PLANTING  
WITH US!
